

Protocol related to the protection and prevention of the health of the students and teachers of the WINGATE SCHOOL, against COVID-19 in Physical Education classes to be held at the José Antonio Fumero Soccer Field in Cabo Blanco.

Due to the protocol for the protection and prevention of health against COVID-19, the physical education classes for the academic year 2020/2021 are scheduled to begin on September 15 of this year 2020, attaching a timetable, where it specifies the hours (9:00 a.m. to 3:45 p.m.).

The school management already has its own protocol required by the Ministry of Education of the Government of the Canary Islands, to which it also adds the following measures when teaching physical education classes at José Antonio Fumero Soccer Field in Cabo Blanco.

Wingate School will take the following measures for the prevention and mitigation of COVID-19 infections during the course of the activities:

1. The school management puts the health of all students and teachers before any other conditioners, adopting the timely action accordingly.
2. All regulations issued by the education concierge, in health matters, and any applicable ones, and all related recommendations on the practice of any outdoor teaching activity such as the one at hand, must be strictly complied with.
3. All students and teachers must wear masks to and from the Soccer Pitch.
4. The measures to be adopted by students and teachers are:
 - **Hand hygiene:** frequent washing is mandatory, students will use sanitizing gel before leaving the school premises, as well as go through the shoe disinfectant mat, which will be located at the entrance. In the case of people allergic to hydroalcoholic gel, it is recommended to only use soap and water
 - **Social Distancing:** Classes will be taken to the soccer pitch in their designated groups leaving a reasonable time space between each group when departing from the School and the Soccer Pitch. The students of each class will remain in their designated groups whilst on the pitch and where necessary use each

corner of the soccer field and at least 1.5m interpersonal distance must be maintained, and if this is not possible, they must use masks, except when they are practicing any physical exercise or sports activity

- **Non-contact sports:** The PE classes will consist of non-contact sports only
 - **Respiratory hygiene:** in the case of coughing and sneezing, it should be done in flexure of the elbow, the use of disposable tissues, etc. is recommended
 - **Hygiene of the Sports Equipment:** the school will provide the sports equipment and each teacher will be responsible, and at the end of each class, the teacher will have to disinfect said sports equipment
 - **Entrance and exit circuit:** the students and teachers of the school will have the usual entrance door at their disposal to enter and exit the campus, which must remain closed while classes are taught. Once these are finished, both the students and the teacher will leave the facilities, after organizing the management so that an incoming group does not coincide with an outgoing group in the class area
 - **Equipment:** Students are to take a small bag to the pitch with their water bottle and spare masks to the Soccer Pitch
 - **Facilities:** Teachers and students are required to use their own bottle of water, as well as request permission from their teacher to use the bathrooms where a hydroalcoholic gel dispenser will be placed. The teachers will assign a responsible student to disinfect the toilets after each class
5. If a close relative of a student, teacher, member school address or authorized person has symptoms or has tested positive for COVID-19, Wingate School will quickly notify the IGARA CD to proceed with the activation of the corresponding protocol.
6. The school is governed by the *“Protocol of prevention and organization for the development of face-to-face educational activity in non-university educational centers in the Canary Islands, academic year 2020-2021 (version 23 July 2020).*

Colin Macrae

Head of Wingate School
