

Wingate Sixth Form

The right choice for post-16 learning

2019 - 2020

Wingate Sixth Form

You have reached an important crossroads in your life. We hope this prospectus helps you make the right choices.

Wingate School is growing and moving from strength to strength. Joining our Sixth Form is being part of the drive and commitment by staff and students to make Wingate Sixth Form Study Centre an environment of excellence for advanced learning.

You will find a constructive atmosphere, one where we are determined to ensure that your time here is successful and you achieve the best academic results you can. Part of our school ethos is that we are a family and as such, we help and support each other. This means that the student, the school and parents work together. Our approach is transparent and we will discuss student progress together on a regular basis. Wingate Sixth Form is not always the right environment for a student and we will tell you if we feel this is the case.

Wingate Sixth Form is completely selective. An invitation into the Sixth Form is formally made on an individual basis taking into account not only academic achievement but also punctuality, attendance, work ethic & attitude towards study and behaviour.

All AS & A Level courses are academically demanding, they require success at IGCSE and you will need a minimum of 5 A* to C grades or the new IGCSE levels 9 to 5. Some subjects require a minimum entry level of A* to B or 9 to 6 grades.

Entering Wingate Sixth Form is a big step. There are lots of challenges and opportunities, many exciting and many demanding. Although you are expected to be responsible for managing your time, from this September, any non-contact lessons will be in a supervised area or (in agreement with the teacher), in a subject classroom. This will give you the opportunity to develop independent study skills, further your curriculum studies, research career options, take online courses and undertake school-based work experience. Project work is a feature of many A Level courses and you will be expected to complete this work in these study times or, if you are working in a team, you can work together in S4 or S5 classrooms in the Sixth Form Study Centre. You will be expected to take responsibility for your own learning with the help, advice and support of your teachers, tutors and supervisors.

Alongside your studies you will have the opportunity to take on a range of responsibilities such as organising charity events or assisting with activities in school. Indeed, the expectation is that you do carry out extra-curricular activities based on your interests and future plans. We actively encourage you to undertake work experience in the holidays. These enhance your university or job applications and help make you a 'well-rounded' individual.

For new students whose first language is not English and who may find the technical English language too difficult to study at A & AS level, we may be able to offer the Year 12 Standard Course (12S). This decision will be based on entrance exams and take into account qualifications from your home country. In 12S you will study a number of IGCSE subjects where we expect you achieve at least a grade C in First Language English and Mathematics. This option allows you to improve your English skills and also introduces you to the technical terminology that is a part of all subject examinations. The following year, you may be eligible to begin your studies for AS & A levels.

For Wingate students coming through from Year 11, you will have to meet the subject grade requirements stated in the prospectus for the subjects you wish to study. Year 12S is not available and we may insist on you retaking Year 11 as a Year 11 student, leading to the Sixth Form the following year (subject to the conditions stated above).

You can find out more about subjects and courses from your teachers, from the information in this booklet, the school website www.wingateschool.com and by researching on the internet.

Students accepted into Year 12 for 2019/2020 are at the beginning of a new, revitalised and re-focused Sixth Form at Wingate School. The Sixth Form Study Centre has been set up to facilitate and support academic study. You should understand that we are a school and not a College. As such, you should think of Year 12 as an extension of Year 11 with strategies in place to encourage independent research and learning which helps prepare you for further study and the world of work.

Dress Code:

There is a strict dress code in the Sixth Form. You can either choose to continue wearing the same uniform as in Year 11 or:

- Students can wear single coloured polo shirts but only with a small, discreet manufacturer's logo, they can be long or short sleeved. You can also wear a single coloured long or short sleeved shirt
- Black or dark coloured trousers or knee length tailored shorts for male and female students
- Females can wear single colour, knee length skirts
- Single coloured sweatshirts are also permitted but only with a small, discreet manufacturers logo
- School sports kit can be worn and training shoes can be any reasonable style or colour. The school sweatshirt or school tracksuit can be worn in cooler months
- **ABSOLUTELY NO HOODIES, NO DENIM CLOTHES OR RIPS IN TROUSERS**
- Rules on hair for students remain as they are in the senior's. Females may wear their hair down but the rules remain the same on colour
- Male students should have short, tidy hair and be clean shaven
- Females can wear 2 stud earrings per ear and males 1 stud earring per ear. No other piercings or visible tattoos
- Females' nails can be painted but of a reasonable length not 'talons'! You have to be able to type easily
- One necklace and 1 wristband or bracelet for males and females
- Makeup should be kept to a minimum

Students not respecting the dress code, will be given 1 warning. Subsequent breaches will mean students are sent home to change. If any member of staff deems your dress to be inappropriate, then it is inappropriate. A persistent lack of adherence to the dress code will result in disciplinary action as per the School Behaviour Policy.

Chromebooks and Mobile Phones:

Students must continue to use their school chromebook for lessons and study periods. Mobile phones are banned in the main school area and may only be used at break and lunchtime in the Sixth Form. Mobile phones seen or used outside of these times will be confiscated. Mobile phones are not to be used as a substitute for a chromebook at any time. This is because your phone does not have the internet safeguards that your chromebook does.

Attendance:

Regular attendance and punctuality are critical to your success. 95% attendance is the minimum target but below 90% will adversely affect your academic progress. Punctuality is also very important. Year 12 have registers taken at 09.00 and 13.30. Year 12 students are not allowed to leave the school at anytime during the school day. At break or lunch you may go to the cafe adjacent to the school. Any student leaving the school for a legitimate reason i.e. medical appointment should sign out at the school office and back in again on return.

Driving Licence:

If students drive their own vehicle to travel to and from school, they are not permitted to transport other students within the school day.

We welcome you to our courses in Year 12 and 13 and are looking forward to working together to enable you to achieve the very best success in your studies here.

Mrs C Crone
Head of Sixth Form

Mr C Macrae
Head of Wingate School

A Guide to Life in Wingate Sixth Form

A helping hand

Your teachers are here to help and support you through your studies. They are all highly qualified and skilled in their fields and will offer professional guidance and monitor your progress closely.

You will have regular discussions with your tutor about your progress, as well as support in your career planning. Whatever your next destination is to be - employment, training, college or university, there will be support and advice available.

Wingate Sixth Form is small enough for you to mix easily and get to know staff well, yet equipped to offer you a range of opportunities with quality teaching.

Regular monitoring of progress

Assessments are made on a regular basis. This is to ensure that you are coping with the workload and making good progress. Any problems will be raised swiftly with you and your parents. There will be regular communication with parents to ensure that they are kept fully informed of your progress.

A place to study

From September, the Sixth Form Study Centre will be a supervised learning environment with increased study space. Students in Year 12 are expected to establish the right work ethic early in their sixth form studies. Good AS level grades are the basis and requisite for good A2 level results which will lead to university places for those that choose to follow that route. Printer facilities and Internet access are available.

Extra-curricular activities

Wingate Sixth students are able to attend sports classes on a Friday afternoon. We also run the internationally recognised Sports Leaders Award, which is equivalent to 2 further GCSEs. We encourage students to get involved in useful activities such as mentoring, helping younger children or helping within the PE department and we try to give them exposure to the world outside Wingate by talks from outside speakers and trips designed to develop their team working skills. For students with a special interest such as Drama, opportunities to help during lessons with small group work are also available.

Additionally, we provide access a certificated Basic First Aid course and we also give students the opportunity to take part in fundraising activities.

Mentoring and support:

There is an established mentoring Scheme in the Sixth Form and students have access to the Head of Sixth Form, their Form Tutor or subject teachers. Progress reviews are also carried out with students. These help identify areas of good working practices and also areas where improvements to work habits, personal organisation and progress can be discussed. Our aim as a school is to support you in maximising your potential. We expect a strong degree of self-discipline when it comes to learning and encourage you to be responsible for your own behaviour and work ethic.

Every week there is a Personal Development Planning session, where in Year 12 we cover topics such as: learning styles; work planning; revision planning and study skills. Towards the beginning

of the third term we start to look at career options and job opportunities linked into University courses. This of course culminates in University applications for the Year 13 students.

The school has recently purchased a new software programme - Unifrog. This is a superb package which will advise you on career choice, degree programmes and university applications across the world. You will learn more about this in Year 12 PDP lessons.

Choosing Subjects

Think carefully about which subjects to choose. Clearly, enjoyment of, and ability in, a subject is of crucial importance; remember you will be specialising in it for two years. Some subjects are a more advanced continuation of your IGCSE studies while others will be new to you. Find out more about these subjects before deciding which to take. Talk to the relevant teachers', speak to students already studying it and do some research about the topics you will cover.

You can study full-time or part-time, though full-time is preferable. Full-time students may take full advantage of all facilities on site. Part-time students are only in school for their lessons.

The Advanced Courses

Full-time students will normally study four subjects at AS level in Year 12, selecting three of these to continue at A level in Year 13.

Normally, students tend to choose related subjects at AS/A level. Of course, students are free to choose whatever combination suits them, dependent on timetable restrictions (see Subject Choice below). Take advice on which subjects would suit you and which would fit your career ambitions. They also depend on your IGCSE results.

Your final A Level grade is based on the combination of your results from both AS and A2 exams - not just the ones you achieve in your second year. If you think you have not done well enough in Science subjects or Maths at AS level (Edexcel IAL), you may have the opportunity to re-sit these units. Resits are only available in Edexcel IAL subjects and some Cambridge International (CIE) AS level subjects. However, languages have become 'linear', which means the AS is not part of the overall final grade but is a *standalone* qualification. The final exam in Year 13 will be based on the two years of study, similar to the IGCSE courses. For more details please consult the document in the Sixth Form area on the school website: 'Wingate Exams Explained'.

AS and A Level Subjects for September 2019

You need at least five IGCSEs at A* - C, or 9 - 5, to take AS and A levels in Year 12. However, some subjects require at least a B, or grade 6 at IGCSE to access the course.

Biology:

Students sit the Edexcel International Advanced Level (IAL) in Biology which is available for International centres only. This qualification contains a written exam instead of coursework. This subject lays the foundation for a wide variety of further studies in Biology based Sciences, from Medicine to Marine Biology.

The IAS has 3 units which are assessed by written exams:

Unit 1: Molecules, diet, transport and health

Unit 2: Cells, development, Biodiversity and Conservation

Unit 3: Practical Skills in Biology I

The IAL consists of 3 more units which are assessed by written exams:

Unit 4: Energy, Environment, Microbiology and Immunity

Unit 5: Respiration, Internal Environment, Coordination and Gene Technology

Unit 6: Practical Skills in Biology II

Entry requirements: Level 6 or higher in IGCSE Biology and a grade B or level 6 and above in IGCSE Maths.

Chemistry:

Students sit the Edexcel International Advanced Level (IAL) in Chemistry which is available for International centres only. This qualification contains a written exam instead of coursework.

This course provides the foundation for further careers in everything from Medicine to Architecture and Engineering, providing the essential link between Biology and Physics.

The IAS has 3 units which are assessed by written exams:

Unit 1: Structure, Bonding and Introduction to Organic Chemistry

Unit 2: Energetics, Group Chemistry, Halogenoalkanes and Alcohols

Unit 3: Practical Skills in Chemistry I

The IAL consists of 3 more units which are assessed by written exams:

Unit 4: Rates, Equilibria and Further Organic Chemistry

Unit 5: Transition Metals and Organic Nitrogen Chemistry

Unit 6: Practical Skills in Chemistry II

Entry requirements: Level 6 or higher in IGCSE Chemistry and grade B or level 6 and above in IGCSE Maths.

Physics:

Students sit the Edexcel International Advanced Level (IAL) in Physics which is available for International centres only. This qualification contains a written exam instead of coursework.

The course will enable students to acquire sufficient scientific understanding to continue with further studies in subjects such as IT, Engineering and Maths as well as Physics.

The IAS has 3 units which are assessed by written exams:

Unit 1: Mechanics and Materials

Unit 2: Waves and Electricity

Unit 3: Practical Skills in Physics I

The IAL consists of 3 more units which are assessed by written exams:

Unit 4: Further Mechanics, Fields and Particles

Unit 5: Thermodynamics, Radiation, Oscillations and Cosmology

Unit 6: Practical Skills in Physics II

Entry requirements: Level 6 or higher in IGCSE Physics and a grade B or level 6 and above in IGCSE Maths.

English Literature:

Students can study CIE English Literature. AS and A2 Literature consists of an in-depth study of a selection of prose, drama and poetry set texts. Students study four texts are studied in Year 12: a poetry collection, modern novel and two modern plays. In YR 13, students study a further two texts: Shakespeare and a pre-20th century novel, plus take an exam that assesses their ability to respond to, and analyse unseen texts.

English Language:

CIE AS and A Level Language can be studied independently or alongside English Literature. At AS Level, the course consists of in-depth analysis of different text types and directed writing, as well as imaginative, discursive and argumentative writing for different purposes and audiences using appropriate vocabulary, tone, and style. These skills are built on at A Level, with further analysis of different text types and writing for specific purposes and audiences. Students also study a range of language topics, including: spoken language and social groups; English as a global language; and language acquisition by children and teenagers.

Entry requirements: Grade A* - B or 9 - 6 at IGCSE in both First Language English and Literature.

Mathematics:

This is a two-year course which includes Edexcel AS Mathematics at the end of Year 12. The course consists of six units:

Four units in Core Maths: Two in Year 12 and two in Year 13. These cover algebra, calculus, co-ordinate geometry, functions, graphs, logarithms, numerical methods, proof, sequences, trigonometry, and vectors. The other two units are chosen from the following:

Decision Maths: It includes algorithms, algorithms on networks and graphs, the route inspection problem, critical path analysis and linear programming

Mechanics: Mechanics is the study of motion. The topic will include in-depth analysis of forces, velocity and acceleration. It can be applied to all objects from the mundane throwing of a ball to the orbits of the planets and the beginnings of rocket science

Statistics: This course includes detailed analysis of data, the presentation of data and aspects such as correlation, regression, probabilities and distributions

Entry requirements: Grade B or level 6 and above at Maths (Higher) IGCSE.

Business Studies:

The Business Studies syllabus enables students to understand and appreciate the nature and scope of business, and the role it plays in society. It encourages a critical understanding of companies and the markets they serve. Students examine the management of organizations and, in particular, the process of decision-making in a dynamic external and global environment.

The course comprises five Core units for the AS Course while extension topics and a Strategic Management unit are studied at A2 Level.

The course prepares students to enter university to study a wide range of business-related topics, to compliment almost any other university course, or to enable them to run their own business.

Entry requirements: Students need not have studied Business at IGCSE: The course requires a minimum of Grade C or level 5 at IGCSE in First Language English.

Spanish:

While living in Spain, it is important that our students acquire knowledge, skills and understanding of the Spanish language for practical use, further study and/or employment.

Edexcel AS & A2 Spanish are the new 'linear' syllabus as mentioned earlier. Over the two years student study 4 units in depth. All 4 units are tested at the end of Year 13 (similar to IGCSE courses).

Although the AS is a stand alone qualification, students will be encouraged to sit the AS exam at the end of Year 12 to consolidate their learning and receive an AS grade.

Entry requirements: To study AS, a minimum grade B at IGCSE Spanish Foreign Language or a grade C at First Language Spanish.

Travel & Tourism:

CIE A Level T&T introduces students to the scope and economic importance of travel and tourism in general but much reference is made to tourism in the United Kingdom, Europe and case studies from Tenerife.

Through four units it tracks the development of the industry post-war and brings the student right up-to-date with the latest trends. In Year 12, students collaborate on a tourism based project which forms Unit 2 of the course. This is internally assessed and verified and externally moderated by CIE.

The course is designed to equip the student for direct entry into the industry and is also ideal for those wanting to follow a related career. There is much crossover with both Geography and the marketing and promotion side of Business Studies. The course is a mixture of written external examinations and coursework.

Entry requirements: Students need not have studied T&T at IGCSE. You need a minimum of grade C or level 5 at IGCSE in First language English

Subject Combination Choice

Each year we review the combination of subjects in each option block and we endeavour to accommodate students' choices of subjects by structuring the option boxes accordingly. However, inevitably, there may be some areas where a combination of choices will not be possible.

Normally, students choose **four** subjects (one from each block) in total at AS Level in Year 12 and then go on to choose **three** to study at A Level in Year 13.

Year 12 Subject Combination Choices for 2019

A	B	C	D
Mathematics	Physics	Biology	Chemistry
English Language + /or Literature	Business	Travel & Tourism	Spanish

Higher Education/University entry

Entry to Universities:

Normally this requires success in three subjects at A level. The higher the grades you achieve, the greater the choice of universities and courses open to you. Universities may also look at your IGCSE results as well as your AS and A level grades. We will guide you through the process of applying for university in the UK, Europe or further afield. Some Universities offer Foundation courses or Foundation Degrees but this route normally means an extra year at university.

For students whose first language is not English, there may be an additional requirement to take an IELTS English language qualification for access onto a course taught in English. This is taught at the school but examined in the north of Tenerife.

Entry to Universities in Spain: It is set at a minimum of three A levels and a maximum of four. It is also possible to be admitted with two AS and two A levels. Of course, your Spanish needs to be good enough for you to continue your studies in Spanish. We advise Spanish to at least AS standard.

Students considering entry to Spanish university must seek guidance from Sra Barrio in Year 12 on which A level subjects are required for particular Spanish university courses. We will guide you through the application process to the Spanish university of your choice.

Homologación (formerly known as Convalidation) is required at the end of Year 13 if students wish to continue onto Spanish vocational qualifications at higher level and, in some cases, for entry into a Spanish University.

We look forward to seeing you!
